## **IP6117 Dual-Codec Wireless Networking Camera w/ 2-way Audio**

The IP6117 is a powerful dual-codec wireless network camera supporting 2-way audio. Connected to an Ethernet connection this camera provides remote access to high-quality video and audio. The 2-way audio and upgradeable day/night features make this camera more suitable for many surveillance applications where light conditions change. Users can easily access synchronized audio and video footage in real-time via internet connection.
