

DigiCam Surveillance

IP7131 PoE Network Camera

The IP7131, with a VVTK-1000 SoC processor, offers superior quality MPEG-4 videos at 30 fps in full VGA resolution, and gives viewers image clarity and transmission efficiency that was once impossible. It comes with 3GPP/ISMA compatibility; a new ability allowing users to monitor cameras from not only standard web browser or application software, but also 3G cellular phones anytime, anywhere. The IP7131 supports built-in IEEE 802.3af-compliant PoE (Power over Ethernet) function, which is a new technology transmitting power along with data over standard network cables. With it, not only is the installment of a network camera easy to be implemented where it is inconvenient to feed the devices power from a power outlet but also the easier application of Uninterrupted Power Supplies (UPS) can be carried out to secure stable operations.

FEATURES

- VGA CMOS Sensor
- Up to 30 fps in Full VGA Resolution
- Real-time MPEG-4 Compression (Simple Profile)
- Power over Ethernet (PoE) Built-in
- Supports 3GPP/ISMA Mobile Surveillance
- Digital I/O for Sensor and Alarm
- Easy to Install and Configure
- Optimized Synchronization of Audio and Video
- Video Motion Detection, with Pre- and Post- Alarm Snapshots
- Superior Low Light Performance

Camera will fit in 605 Housing
